

Heavy Duty Castors

- TFH Fixed Castors: heavy gauge press formed sideplates welded to the top plate
- TSH Swivel Castors: heavy duty forged steel top plate joined to an outer swivel ring by a full complement ball race running in hardened tracks. The race serves as both a thrust & radial bearing & is provided with a nylon seal at the top & greased through a hydraulic nipple. The closed base of the ring prevents downward escape of the lubricant & completes the grease reservoir. The sideplates are press formed to a cylindrical shape to give the best strength to weight ratio & are continuously welded to the swivel ring
