

WHAT IS RACK ARMOUR ©?

Rack Armour is an innovative, tough and inexpensive device with which to significantly reduce damaged racking costs. Rack Armour incorporates classical defensive design principles using modern **ballistics grade** materials with which to protect your pallet racking.

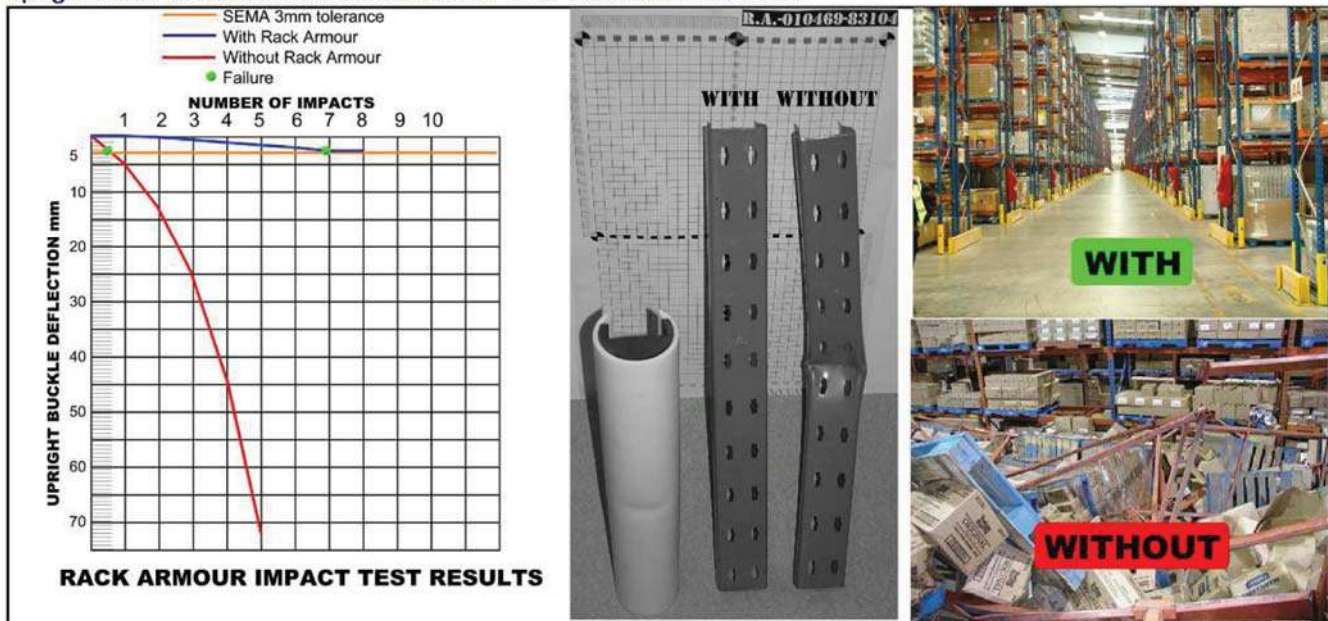

HOW MUCH IMPACT CAN RACK ARMOUR © WITHSTAND?

The test below simulated a Fork Lift Truck weighing 2000kg travelling at 1.8 meters per second that would hit the racking with a force of 21.6 kilo Newtons (2.4 tons)

RESULTS?

Within the parameters of this test and based upon the average conservative costing of £400.00 to repair/replace a damaged racking upright. The cost benefit of fitting one Rack Armour per upright would be £383.20 per upright! This is based upon specific Industry Guideline compliance of replacing uprights with a 3mm front dent measured over 1000mm B.S. 5950.

YOU CHOOSE

Immediate, positive and 'real world' benefits can easily be yours by installing Rack Armour on your existing or new pallet racking. No catch, no gimmick. To put it simply, **RACK ARMOUR WORKS!** Only you can choose whether you want it to work for you. Investing in Rack Armour is approximately 20% of the cost of a 3000mm length of replacement rack upright! Discounts for large orders, High visibility, Red and Green colours are all the same price. Finance options are also available which enable you to prevent repair costs immediately thus enabling your Rack Armour installation to be self financing. Good luck in your choice.

THESE COMPANIES KNOW SOMETHING YOU DON'T. LET RACK ARMOUR SHOW YOU HOW EASY IT IS TO FIND OUT
